

Washtenaw Community College Comprehensive Report

ASV 132 Automotive Engines Effective Term: Fall 2019

Course Cover

Division: Advanced Technologies and Public Service Careers

Department: Automotive Services

Discipline: Auto Services

Course Number: 132

Org Number: 14100

Full Course Title: Automotive Engines

Transcript Title: Automotive Engines

Is Consultation with other department(s) required: Yes

Please Explain:

Publish in the Following: College Catalog , Time Schedule , Web Page

Reason for Submission:

Change Information:

Consultation with all departments affected by this course is required.

Rationale: Three-year master syllabus update based on assessment results.

Proposed Start Semester: Fall 2019

Course Description: In this course, students explore the theory, operation and repair of automotive gasoline engines with emphasis on component identification, operation and proper measurement techniques. Students gain skills such as disassembly, assembly and running procedures with automotive drivetrains on test stands and also develop practical skills with on-car diagnostics and repairs.

Course Credit Hours

Variable hours: No

Credits: 4

Lecture Hours: Instructor: 45 **Student:** 45

Lab: Instructor: 60 **Student:** 60

Clinical: Instructor: 0 **Student:** 0

Total Contact Hours: Instructor: 105 **Student:** 105

Repeatable for Credit: NO

Grading Methods: Letter Grades

Audit

Are lectures, labs, or clinicals offered as separate sections?: NO (same sections)

MST 110 minimum grade "C"

General Education**Request Course Transfer**

Proposed For:

Student Learning Outcomes

1. Identify various automotive parts and how they interact in a gasoline engine.

Assessment 1

Assessment Tool: Project checklist and Module Exam

Assessment Date: Fall 2022

Assessment Cycle: Every Three Years

Course section(s)/other population: All sections

Number students to be assessed: All students

How the assessment will be scored: Departmentally-developed rubric.

Standard of success to be used for this assessment: 70% of the students will score 70% or higher.

Who will score and analyze the data: Departmental faculty

2. Read and interpret vehicle service manuals.

Assessment 1

Assessment Tool: Project checklist and Module Exam

Assessment Date: Fall 2022

Assessment Cycle: Every Three Years

Course section(s)/other population: All sections

Number students to be assessed: All students

How the assessment will be scored: Departmentally-developed rubric.

Standard of success to be used for this assessment: 70% of the students will score 70% or higher.

Who will score and analyze the data: Departmental faculty

3. Recognize, diagnose and recommend service and repairs for internal engine components.

Assessment 1

Assessment Tool: Project checklist and Module Exam

Assessment Date: Fall 2022

Assessment Cycle: Every Three Years

Course section(s)/other population: All sections

Number students to be assessed: All students

How the assessment will be scored: Departmentally-developed rubric.

Standard of success to be used for this assessment: 70% of the students will score 70% or higher.

Who will score and analyze the data: Departmental faculty

4. Recognize, diagnose and replace engine gaskets due to failures.

Assessment 1

Assessment Tool: Project Checklist and Module Exam

Assessment Date: Fall 2022

Assessment Cycle: Every Three Years

Course section(s)/other population: All sections

Number students to be assessed: All students

How the assessment will be scored: Departmentally-developed rubric.

Standard of success to be used for this assessment: 70% of the students will score 70% or higher.

Who will score and analyze the data: Departmental faculty

5. Disassemble, reassemble and test automotive gasoline engines.

Assessment 1

Assessment Tool: Project Checklist and Module Exam

Assessment Date: Fall 2022

Assessment Cycle: Every Three Years

Course section(s)/other population: All sections

Number students to be assessed: All students

How the assessment will be scored: Departmentally-developed rubric.

Standard of success to be used for this assessment: 70% of the students will score 70% or higher.

Who will score and analyze the data: Departmental faculty

Course Objectives

1. Complete a work order that includes customer information, vehicle identifying information, customer concern, related service history, cause, and correction.
2. Identify and interpret engine concern, diagnose problems and determine necessary actions.
3. Research vehicle service precautions and technical service bulletins.
4. Research applicable service information such as internal engine operation and vehicle service history.
5. Inspect engine assembly for fuel, oil, coolant, and other leaks and determine necessary actions.
6. Diagnose engine noises and determine necessary actions.
7. Diagnose engine vibrations and determine necessary actions.
8. Perform engine vacuum tests and determine necessary actions.
9. Diagnose the cause of excessive oil or coolant consumption and determine necessary actions.
10. Diagnose the cause of unusual engine exhaust color and odor and determine necessary actions.
11. Perform cylinder cranking and running compression tests and determine necessary action.
12. Perform oil pressure tests and determine necessary actions.
13. Inspect and test radiator, pressure cap, coolant recovery tank, and hoses and determine necessary actions.
14. Perform cooling system pressure tests and determine necessary actions.
