Course UAP106	Course title Oxy Fuel Cutting and Shielded Arc Weldi	ng		
Course description  State the purpose and content of the course.  Please limit to 500 characters.	All phases of welding are covered in this course beginning with oxyacetylene and oxy-fuel cutting and welding progressing through shielded metal-arc welding test procedures. Topics include tools, equipment, types of rod weld positions, proper gaps, bevels and the various types of lap and butt joints. Safety is stressed throughout. This course is taught at United Association (UA) Training Centers throughout the United States and Canada. Enrollment is limited to apprentices accepted in to a UA training program.			
Course outcomes	Outcomes	Assessment		
List skills and knowledge	(applicable in all sections)	Methods for determining course effectiveness		
Assessment method Indicate how student achievement in each outcome will be assessed to determine student achievement for purposes of course improvement.	Upon successful completion of this course, the student will be able to:  To explain the use of oxy-fuel equipment to regulate torch use  To identify the proper equipment for welding and/or cutting steel  To describe the safe use of oxy-fuel torches  To demonstrate proper cutting, beveling and welding techniques	This course is assessed externally by the local's Joint Apprenticeship Training Committee (JATC), consisting of industry representatives and UA members. The local receives feedback on needed technical updates and apprentice skill performance.		
Course Objectives	Objectives	Evaluation		
Indicate the objectives that support the course outcomes given above.	(applicable in all sections)	Methods for determining level of student performance of objectives		
Course Evaluations Indicate how instructors will determine the degree to which each objective is met for each student.	Objectives and evaluation methods follow the International Pipe Trades Curriculum Outline issued by the UA Training Department.			

List all new resources needed for course, including library materials.

No new resources, courses are taught at existing UA local training schools.

## MASTER SYLLABUS

Equipment/Facilities: Check all that apply. (All classrooms have overhead projectors and permanent screens.)			
Check level only if the specified equipment is needed for all sections of a	Off-Campus Sites		
course.  Level I classroom	Testing Center		
Permanent screen & overhead projector	Computer workstations/lab		
Level II classroom	□ITV		
Level I equipment plus TV/VCR	TV/VCR		
Level III classroom	Data projector/computer		
Level II equipment plus data projector, computer, faculty workstation	Other Taught at UA Local schools		

Assessment plan:

Learning outcomes to be assessed (list from Page 3)	Assessment tool	When assessment will take place (semester & year)	Course section(s)/other population	Number students to be assessed
<ul> <li>To explain the use of oxy-fuel equipment to regulate torch use</li> <li>To identify the proper equipment for welding and/or cutting steel</li> <li>To describe the safe use of oxy-fuel torches</li> <li>To demonstrate proper cutting, beveling and welding techniques</li> </ul>	Contractors (employer) provide paper feedback forms for apprentice skill performance reviews.  JATC contractor members provide specifications detailing technical updates.	WCC will prepare a summary report on assessment activities in Winter 2011 and every three years thereafter	All	All

## Scoring and analysis of assessment:

1. Indicate how the above assessment(s) will be scored and evaluated (e.g. departmentally developed rubric, external evaluation, other). Attach the rubric/scoring guide.

Individual locals use apprentice feedback forms filled out by the employing contractor.

2. Indicate the standard of success to be used for this assessment.

The standard of success is set by the local JATC.

3. Indicate who will score and analyze the data (data must be blind-scored).

The data is analyzed by the JATC as a committee.

4. Explain the process for using assessment data to improve the course.

Results are initially shared with the training coordinator for the local. The training coordinator then works with appropriate instructor staff to make needed changes.
